

---- CARE & MAINTENANCE ----

Aluminum Sling & Strap Patio Furniture

Supplies Needed

1. Bucket or Spray bottle
2. Soft Bristle Brush or Sponge
3. Eye protection

Cleaning & Maintaining the Aluminum Frames

Always wear eye protection to prevent foreign liquid or material from entering the eye.

It is best to remove soiling and spills as they happen as they will be much easier to clean. This can be done by rinsing the product thoroughly with fresh water and brushing with a soft bristle brush if necessary.

To remove stubborn dirt or stains from the frame or heavy soiling that has accumulated over time clean the frames with warm, soapy water and mild soap. Brush with a soft bristle brush as necessary.

To maintain the original luster on smooth finishes use a fine automotive wax and follow the directions as specified on the container. Take care not to get excessive wax in the fabric as it will be hard to remove. On textured finishes periodically apply mineral or baby oil.

**DO NOT USE A PRESSURE WASHER TO CLEAN YOUR FURNITURE.
IT WILL VOID YOUR MANUFACTURERS WARRANTY.**

The force of the compressed water can damage or remove the finish and could harm the fabric.

Cleaning & Maintaining the Straps or Fabric

Always wear eye protection to prevent foreign liquid or material from entering the eye.

Sling Fabrics

Spot wash the fabric to clean spills by using a sponge or a soft bristle brush with a warm soapy solution of mild detergent (Joy or Ivory liquid). Brush or sponge the soiled area and rinse thoroughly with fresh water. Allow to air dry.

For stubborn stains or to remove discoloration from mildew use a mixture of one part bleach to 6 parts water. Spot test a small area in an inconspicuous location for color fastness. Apply the mixture to the sling fabric and brush with a soft bristle brush. Take care not to get any on your clothes as it will discolor them. Rinse thoroughly with water and allow to air dry. Repeat again if Necessary.

DO NOT USE STEAM OR WATER EXCEEDING 100° F TO CLEAN YOUR SLING FABRIC. DO NOT USE SOLVENTS, CARBON TETRACHLORIDE, SCOURING AGENTS, JANITORIAL CLEANSERS, GASOLINE, METAL BRUSHES OR HARD PLASTIC BRUSHES TO CLEAN YOUR SLING FABRIC. YOU MAY DAMAGE THE THREADS.

Vinyl Strap

Clean with a mixture of mild soap and warm water. Rinse thoroughly and allow to air dry. Spray Armour-All on the vinyl strap after they are clean and dry to protect them. All vinyl straps contain an effective fungicide and UV stabilizers. If not maintained and cleaned periodically, mold and mildew will begin to grow on the accumulated dirt and grime and eventually migrate to the vinyl strap. Once the vinyl strap is stained with mold or mildew it is very hard to clean and in some cases impossible to remove the discoloration. A vinyl strap chair can have new straps put on to give it a fresh new look.

DO NOT USE SOLVENTS, CARBON TETRACHLORIDE, SCOURING AGENTS, JANITORIAL CLEANSERS, GASOLINE, METAL BRUSHES OR HARD PLASTIC BRUSHES TO CLEAN YOUR STRAPS
