Introduction

Florida Family Owned Since 1971, Garden Classics™ has been designing and manufacturing comfortable outdoor living products that last in the sun and by the sea. We only use tested materials that are produced to withstand harsh outdoor seaside conditions. Because of our policy of only using high-quality materials, your Garden Classics™ furniture will be easy to own. See the Cleaning and Care section in this ownership packet to get the most out of your investment.

The Difference

Handcrafted

Hand-woven wicker, artisan carved original molds for cast aluminum, or the 25 step hand-finished process to make fiberglass, concrete, and aluminum look like wood, we put the time and effort into each piece to give it a look that will complement your space.

Materials

We hand-pick the materials that go into each piece. Structural frames are all powder-coated aluminum that will never rust. Cast aluminum is made of high-quality alloy. All hardware is 360 stainless steel or better. Our UV-stable synthetic wicker must pass a Tropical 4-year UV test and show no signs of change in color, surface texture, or strength.

Construction

We continuously learn and take steps to make our furniture better than any other outdoor furniture manufacturer. We use thicker aluminum in our frames, pay more for materials with higher UV resistance, and add reinforcement that will never be seen to the places that need it most. Our products are sold to restaurants and hotels with the same construction as the products we sell for your home. Our goal is to make a product so durable that you must give it away before buying your next purchase.

Safety

In our continuing effort to ensure that your experience with your new purchase is positive with regard to comfort, quality and design, we take safety very seriously. Please note the following important safety information and any other safety information noted in this booklet.

Safety Warning! Using furniture in need of care and maintenance or using damaged furniture can result in injury. Minor repair issues, if unaddressed, can become major repair and service issues that can create potential safety issues. Contact the Leader Furniture® Solutions Center for support at solutions.center@leadersfurniture.com

Product Inspection

Periodically and carefully inspect all products for breakage and/or indications of wear. Inspections must include, but not be limited to, joint tightness, spring assemblies, and the weld areas of the product's arms and legs. If joints are loose or any cracks should appear on the product or at welds, the item must immediately be removed from service until repaired.

Inspections must include all bolts and screws. If any loose or missing hardware is detected, the item must be removed from service immediately until the hardware can be properly tightened and/or replaced.

Inspections must include chaise lounge and recliner headrest ratchets.

Periodically tighten the headrest bolts on all chaise lounges and recliners.

Confirm all other hardware is tight, movement is smooth without binding, and

that the ratchet engages properly at each position. At the same time, carefully inspect the headrest ratchets for breakage and/or wear. If headrest ratchet breakage and/or indications of headrest ratchet wear are present, a replacement headrest should be ordered. The furniture must immediately be removed from service until repaired and/or replacement parts installed.

To obtain replacement parts, please see the SERVICE / ORDERING PARTS AND ACCESSORIES section of this brochure.

Product failure caused by a lack of reasonable and necessary care and maintenance is not covered by the product warranty.

Contact the Leaders Furniture® Solutions Center immediately if you notice concerns.
solutions.center@leadersfurniture.com

Safety Warning! Chaise lounge and recliner headrests must NEVER be adjusted while seated in the chaise. Serious finger, hand or other bodily injury may result from adjusting the headrest while seated. Headrests must always be adjusted while out of the furniture and standing to the side.

Windy Conditions

Safety Warning! During windy conditions, chaise lounge and recliner headrests may be blown forward, possibly resulting in head, neck, facial, arm and/or back injuries. During windy conditions, the headrests must be lowered to the fully down position. The use of the chaise lounges and recliners must be discontinued and users should leave the area.

Contract Installation Notice

Periodically and carefully inspect all products for breakage and/or indications of wear. Such inspections must include all products of a like kind and model, not merely a random sampling within model categories or among like products.

Regular random inspections of a sampling within model categories and among like products must be undertaken in addition to the periodic inspections of all products.

- ✓ Chaise lounge
- ✓ Recliners
- ✓ Swivel tilt motion chairs
- ✓ Rocking chairs

Include the following or substantially similar conspicuous written notice as part of the posted Rules and Regulations at poolside and elsewhere wherever chaise lounges and recliners are available for use:

1. "Never adjust chaise lounge or recliner headrests while seated. Serious finger, hand or other bodily injury may result from adjusting headrest while seated."
2. "During windy conditions, the use of the chaise lounges and recliners must be discontinued and users should leave the area."

Consider also including such notice in the written material(s) provided to guests in connection with the availability and use of the guest amenities at your facility.

Contact the Leaders Furniture® Solutions Center immediately if you notice concerns.

HOW?

Follow the manufacturer's instructions on the container.

| | WASH | CLEAN | PROTECT | | | MAINTAIN | |
|--------------|---------------|--|---------------|-----------------------------------|-----------------|-----------------|-----------------|
| | ALL MATERIALS | ALL MATERIALS | WICKER | SYNTHETIC WOOD | ALUMINUM | WICKER & POLY | ALUMINUM |
| BEST RESULT | Gel Wash #54 | Extreme Multi-Surface Cleaner | Quick Wax #59 | Extreme Vinyl & Rubber Protectant | Corrosion Block | Wash N Wax #143 | Corrosion Block |
| QUICK & EASY | Gel Wash #54 |  | | | | Wash N Wax #143 | Corrosion Block |

WHEN?

Protect and clean your surfaces the same way you would protect your skin. Wash off the salt and soiling and apply UV Protection. If you notice soiling it is time to do a little quick and easy maintenance. Otherwise, we recommend at least the following schedule:

| VISIBLE SOILING | COASTAL INCLUDING LAKES | FULLY EXPOSED | SCREEN PORCH | UNDER ROOF COVER |
|-----------------|-------------------------|----------------|----------------|------------------|
| This weekend | Every 2 Months | Every 3 Months | Every 6 Months | Every 6 Months |

WASH

Washing is a vital step in keeping your product looking its best. Washing removes loose contaminants from your surfaces. If allowed to remain, contaminants can eventually bond to or etch your surfaces. Household cleaners will strip off any protection you have applied. Meguiar's Marine Gel Wash is pH balanced, biodegradable to gently clean and preserve your surface protection.

CLEAN

While washing removes loose contaminants from surfaces, cleaning is intended to remove bonded surface contamination and attempt to remove below surface blemishes. Above surface contamination includes tree sap, environmental fallout, bug and bird droppings, and soiling. Below surface defects include light scratches, water spots, and water etching.

PROTECT

The only way to keep your purchase looking great for as long as possible is to apply a protective coating to preserve the surface. Meguiar's protection formulas provide a durable protective layer that seals in the factory new look of your products, offers UV protection and keeps environmental elements from coming in direct contact with your surfaces.

MAINTAIN

Frequent surface care makes maintenance easier. The more frequently you care for your furniture, the easier the detailing process. Maintenance is the frequent removal of contaminants before they get an opportunity to bond to or damage the surface. Maintenance is designed to help you safely remove contaminants without stripping away your protective coatings, leaving your product looking polished and new.

COVER

Covering your furniture puts a barrier between the elements and your purchase. Covers block, rain, sun, and environmental contaminants like pollen and dust. Be sure to use breathable covers in Florida that block rain and allow air to circulate. Using non breathable covers like tarps or plastics trap moisture and promote mildew growth.

solutions.center@leadersfurniture.com

Cushion Care

Drying

After a soaking rain or anytime the cores of the cushions get wet it is best to stand the cushion on end to allow them to drain more quickly. This will prevent mold and mildew growth between the frame and the cushion.

Spot Clean

Spot wash the fabric to clean spills by using a sponge or a soft bristle brush with Meguiar's Extreme Multi-Surface Cleaner. Spray the affected areas and rinse thoroughly. For tough soiling brush area with a soft bristle brush in a circular motion, then rinse.

DO NOT MACHINE WASH OR MACHINE DRY THE CUSHION CASINGS. YOU COULD DAMAGE THE SEAMS.

Cushions made from 100% solution dyed acrylic can be cleaned with Bleach. Use a premixed bleach cleaner or 50% bleach water mixture. You can add mild dish soap to loosen soiling if desired. Check a small inconspicuous spot for color fastness before cleaning the entire cushion. Be sure to rinse the cushion thoroughly to remove all of the bleach solution.

Fluff and Rotate

The more a cushion is used the softer it will feel. Pillow fill can settle and compress. Rotate seat cushions every cleaning. Fluff and loft pillow and backs to restore the look and make a comfortable sit. Not rotating seat cushions over time may make your favorite seat feel noticeably softer than a seat not used as often. Not fluffing pillows and backs occasionally will cause them to look flat and like they are missing fill.

PoliSoul™ Furniture

Some Garden Classics™ items contain PoliSoul Timber. PoliSoul has grain and looks just like Mother Nature created it, but it has absolutely no wood in it. Not a single tree was cut down to make PoliSoul Furniture. This is hard to believe with how beautiful it is and the way it feels.

Caution

Do Not Place Hot Items on Surface

Our beautiful PoliSoul Timber is not completely heat resistant. Care should be taken to protect the surface of the material from fire, sparks, hot containers, or open flame. Prolonged contact from a heat source can cause the surface to become shiny or melt and distort.

Personal Protection

When you perform maintenance and cleaning always keep safety in mind. Protect your eyes and skin from chemicals by using eye protection, protective clothing, and gloves. When using any type of cleaner, especially Bleach, do so in a well-ventilated area.

Regular Maintenance

Regular cleaning of PoliSoul Timber is easy. A wet dish towel to wipe the surface down after each use is sufficient. We recommend the application of Meguiar's Extreme Vinyl Protectant to give your beautiful new furniture added protection. By applying Meguiar's Extreme Vinyl Protectant on your furniture, it will make it even easier to maintain. Application is simple, spray and wipe. Applying Meguiar's Extreme Vinyl Protectant is very similar to using a granite top daily cleaner, and just as easy.

Spills

Even the hardest dried on spills are simple to resolve. Most can be taken care of with a wet dish rag. Occasionally a little more effort is required. For best results don't spot clean, clean the entire area. It is important to note that the table must be fully dry before making an evaluation on your efforts. Take the time to let the top completely dry before escalating your method. Follow the grid below:

| Spill | Within 5 Minutes | Dried On | Still Not Satisfied | Brush / Restore |
|---|--|--|--|--|
| Water ring | Wipe surface and let dry | I know you keep your table clean. Dirt and dust accumulate, and the water ring draws in dirt to create this spot. Clean the entire table surface to remove all soiling. | Meguiar's Extreme Multi-Surface Cleaner on the entire surface and let stand for at least one minute. Rinse surface with clean water, wipe dry. If ring persists repeat but this time scrub the area of the ring with a soft nylon brush. | Use a clean wire brush. In the direction of the grain, apply a heavy pressure and buff in a single direction. Repeat till the area of concern disappears. Clean surface with a damp towel. Not going in the direction of the grain will cause the surface to appear different. |
| Fingerprints Soda Wine & Juice Citrus Ketchup & Sauces Balsamic Vinegar Dressings Spaghetti Sauce Bird Droppings All other | Wipe surface with a wet towel. Focus on the spill but make sure the entire top is cleaned. | Spray Meguiar's Extreme Multi-Surface Cleaner on the entire surface and let stand for at least one minute. Rinse surface with clean water, wipe dry. If ring persists repeat but this time scrub the area of the ring with a soft nylon brush. | Spray Bleach on the affected area and let stand till any remaining indication of the stain fades away. Wash the tabletop with clean fresh water and dry. | Use a clean wire brush. In the direction of the grain apply a heavy pressure and buff in a single direction. Repeat till the area of concern disappears. Clean surface with a damp towel. Not going in the direction of the grain will cause the surface to appear different. |

PoliSoul™ Light scratches and surface marring

Like any beautiful table you can scratch the surface if you drag items across it. Here is the great news with PoliSoul Timber! It is very easy to fix.

Some people like the natural used / repurposed look. Just keeping using the table and it will gain character over time. If you want to keep its appearance "out of the box" new follow these easy steps to remove marring and light scratches.

1. Use a dust mask or other protection to avoid inhaling dust generated from this process
2. With a firm grip on a large clean wire brush, with moderate pressure press down and stroke in the direction of the grain.
3. Work an area larger than the spot to blend the texture you are creating.
4. Stand back and adjust your viewing angle to make sure you have removed the affected area. Repeat step #2 till the concern is no longer noticeable
5. Clean the area by sweeping a nylon brush in the direction of the grain
6. It is recommended that you reapply Meguiar's Extreme Vinyl Protectant to the entire tabletop to make it easier to clean.

California

Proposition 65 Warning

Sanding or scraping this material generates dust known to the state of California to cause cancer. Avoid inhaling dust or use a dust mask or other safeguards for personal protection. California Health and Safety Code Section 25249.6

Sun Fading

It is an undeniable fact that everything will eventually discolor and fades in the sun. The sun is a powerful star that governs our planet and makes life possible. We cannot live without it, but we can learn to live with it. PoliSoul Timber is the best wood substitute developed to date. Not only is it very UV resistant it has the same color and graining throughout. This means that when it finally does fade it can be refreshed using a clean wire brush and rubbing the top surface off in the direction of the grain. Rest assured we have already UV tested PoliSoul Timber's resistance to fading and discoloration in the sun. It past our 4-year equator test with flying colors (pun intended). To refresh your beautiful PoliSoul furniture follow these steps.

1. Use a dust mask or other protection to avoid inhaling dust generated from this process
2. With a firm grip on a large clean wire brush, with moderate pressure press down and stroke in the direction of the grain.
3. Work an area larger than the spot to blend the texture you are creating.
4. Stand back and adjust your viewing angle to make sure you have removed the affected area. Repeat step #2 till the concern is no longer noticeable
5. Clean the area by sweeping a nylon brush in the direction of the grain
6. It is recommended that you reapply Meguiar's Extreme Vinyl Protectant to the entire tabletop to make it easier to clean.

California Proposition 65 Warning

Sanding or scraping this material generates dust known to the state of California to cause cancer. Avoid inhaling dust or use a dust mask or other safeguards for personal protection. California Health and Safety Code Section 25249.6

Stone Top Care

All of our stone products come sealed. The sealer will wear out over time, making the surface harder to maintain and allowing staining. Spills should be wiped up immediately. Acidic liquids like juice and wine can etch the surface if allowed to remain on the surface.

Daily Cleaning

Stone tops can be regularly maintained using the same products used on a stone countertop.

Daily Granite cleaner for a quick surface cleaning.

Sealing

Use any granite sealer that you can find at a home improvement center. Please follow the instructions on the bottle. It is usually as easy as spray and wipe.

Wear Items

The parts that create the comfort in swivel, gliding, and rocking furniture are wear items that must be replaced from time to time. If you are handy with a wrench, the maintenance can be easily done at home. Leaders can provide full service for a fee if requested.

Spring Plates

If your favorite chair starts to feel loose and leans back to far it is time to replace the spring plates. Spring plates are not covered under warranty. Leaders always keeps stock and can cut and make the specific plate you need for any manufacturer. Installing new spring plates is easy.

Remove the Old Plates

1. Before beginning take a picture of your chair for reference.
2. Remove the spring plates from your chair. You will need two wrenches, one to hold the bolt and the other to spin the nut.

It is essential to keep all original hardware removed from your chair as they will be needed to install the new spring plates.

Install the New Spring Plates

1. Use the original hardware to install the new spring plates. Take care to put the washers back in place to prevent the new spring plate from cracking during use.
2. Tighten the spring plates with the two wrenches. Take care not to over tighten and crack the new spring plate

Swivel Tilt Mechanisms

Swivel gliders are the peak of comfort. Occasionally a part may wear out. All of the parts can be replaced at home with minimal tools. When ordering parts ask for the detailed instructions to be emailed to you.

Bucket

- ✓ Part of the chair you sit in

Glider hangers

- ✓ Four flat pieces of metal with bearings in each end connect the bucket to the swivel. This is what allows the chair to glide back and forth

Swivel

- ✓ A sturdy heavy construction that the glider hangers attach to. The swivel has a post that inserts into the swivel sleeve

Swivel sleeve

- ✓ A nylon insert that goes into the chair base that allows the swivel to operate freely

Base

- ✓ The part of the chair that is in contact with the ground

Hardware

- ✓ Eight bolts and eight nylon nuts that bolt the glider hangers to the swivel and the bucket

Service / Ordering Parts

After a safety inspection or at any time during your ownership, please contact the Leaders Furniture® Solutions Center to order replacement parts or to discuss any concerns you may have at: solutions.center@leadersfurniture.com

Warranty

| | <u>Residential 1/1/2019 to present</u> | <u>Residential prior to 1/1/2019</u> |
|--|--|--------------------------------------|
| Frame | 5 Years from date of delivery * | 3 Years from date of delivery* |
| Finish | 3 Years from date of delivery* | 3 Years from date of delivery* |
| Fabric & Cushions | 1 Year from date of delivery* | 1 Year from date of delivery* |
| Spring Plates, Swivel & Glide Parts | 1 Year from date of delivery | 1 Year from date of delivery |
| | <u>Commercial 1/1/2019 to present</u> | <u>Commercial prior to 1/1/2019</u> |
| Frame | 3 Years from date of delivery * | 1 Years from date of delivery* |
| Finish | 1 Years from date of delivery* | 1 Years from date of delivery* |
| Fabric & Cushions | 1 Year from date of delivery* | 1 Year from date of delivery* |
| Spring Plates, Swivel & Glide Parts | 1 Year from date of delivery | 1 Year from date of delivery |

*From date of delivery is defined as the delivery when the product was first delivered to the purchaser. It does not include any subsequent delivery for any additional item(s) or item(s) replaced under warranty. Some fabric mills warranty their fabric for five years. If your cushions are made by fabric from one of these mills and the mill finds the fabric to be defective, the mill will supply us with fabric to make you new covers for your cushions. If you would like complete new cushions made, you may choose to pay for new foam cores while the covers are being remade.

File a Warranty Claim:

We are here to help you after the sale. To help us process your claim as fast as possible please complete the following steps.

Step 1: Take a picture of each item with a concern in a format that you will be able to attach to an email.

1. Take a picture of the entire item with a concern
2. Take a picture of a close up of the concern
3. Repeat for every item with a concern

Step 2: Send a text to (727) 346-8528 or email to solutions.center@leadersfurniture.com and include the following

- ✓ Your name
- ✓ Phone number
- ✓ How many items you have a concern with
- ✓ A description of each concern
- ✓ A picture of each item and a close up of each concern

Step 3: One of our Solutions Center Representatives will get back to you within 24 hours. If you do not hear back for some reason within 24 hours please contact us toll free at (877) 538-5783
