Take a Payment

The way NetSuite manages a customer record causes us to know two different ways to apply a payment. Both are simple to do but we need to know when to use each.

Please Note:

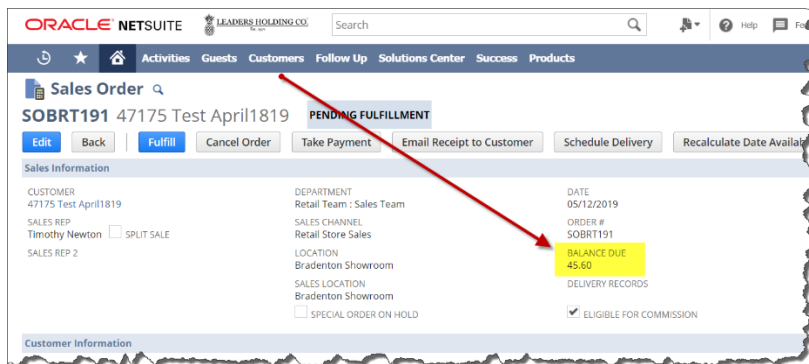

- ✓ If you wait to long to insert a card or the card is pulled out to quickly the transaction will not process.
- ✓ Tap to Pay can be done by holding the phone to the back of the terminal. Please do not move the phone away too fast. If the phone is moved away to quickly the transaction will not work.

If the Sales Order is not fulfilled & Invoiced

Take Payment from the Sales Order

Path: NetSuite-Look Up A Guest Record (View)—Scroll Down To “Sales Tab”—“Transactions”

The balance can be seen on the “Sales Information” tab of a sales order or in the breadcrumb trail at the bottom of each sales order by Subtracting Sold from Paid

Paid	40.00	Opt
Sold	85.60	

1. Look up the customer record using Guest Lookup from the NetSuite home dashboard or the Global Search

2. Select the Guest Record in View mode

3. In View of the Guest Record scroll down to the “Sales” tab and expand the “Transactions” subtab by clicking on it

06/03/2019	Invoice	INVRT38	484.20	Open	No	Sales Order #SOBRT297

A red arrow points to the 'Status' column of the invoice row (INVRT38).

Note: The invoice status will be open if there is an amount still owed.

5. Follow the prompts in the “Accept Payment” screen and press [Save](#).

Get an Error?

Do not start over. Click “Edit” and correct your information.

Why?

- Not sure why you got an error. Go to 3. Refund Method \ Payment events \ View Details \ Raw Response to see why the bank denied the transaction. Do not start over. Edit the transaction based on the response and try again.
