

## 2000 Series Residential Sleep Sofa Systems

### Styling & Design

- **All tubular frame construction** provides a smooth and visually appealing look with improved safety (eliminating pinch points) and comfort in the seated position
- **Double locking TV headrest** provides added comfort while lounging or watching TV by raising the upper body
- To reduce field failures, the headrest also restricts the unit from being cycled while in the "up" position
- **Contoured seat section** offers a wider seating area by allowing seating close to the arm
- **Forest Black color**

### Performance & Engineering

- **Body support tubes and wires** together enhance support in the body section to eliminate sagging. Body tubes keep the unit square and enhance unit strength
- **Polypropylene decking** is designed to extend beyond the metal frame and linkage parts eliminating any metal to upholstery contact
- **Optional seat support wires** provide support while sleeping, plus adding durability to the over all unit. Support wires also give the quality feel of stationary seating

**Engineered low profile linkage** keeps all metal parts below the mattress line, while being the easiest to operate in the industry

**Anti-Tilt** - a necessary safety feature, keeping the unit in contact with the floor at all times in the open position

**Dual one piece tubular legs** provide enhanced stability and strength, allowing the unit to be operated from the center or side position

#### Available Lengths:

Modu Max 2300 (Shallow Frame) - 71" or 180.4cm

RESIDENTIAL -----> **Max Plus 2500 - 72" or 182.9cm**
