Websites

Leadersfurniture.com and our suppliers websites are a great place to find up to date information about products. Websites can be searched quickly to find information and images to help you provide fast, top tier service to a guest.

Table of Contents

Web Browsing Shortcuts

Knowing a few shortcuts will save you a lot of time and help you service a guest quickly resulting in more sales.

Shortcut?	What?	Why?
Search Box	A search box is usually found at the top of a website in the header. Searching in this box will help you find SKU's collections or key words quickly. You search is only as good as what you type in the box. If you don't find what you want, check your spelling, search with fewer words, or try a different term.	Find content anywhere on the website fast
<CTRL> <F>	Using the find function searches all the content on the current page. This will help you find specific information like keywords, SKU numbers, or product types quickly.	Find key on the current page fast
<CTRL> +	Zooming in helps you more clearly read information and focus on specific information.	Read content or see details more easily
<CTRL> -	Zooming out helps you scroll through content faster	Scroll through content faster
